How to use the Firefox OS version

Start to work with MT5

Install the application from the Marketplace. After installation, the icon of the application will appear on the main screen of your device. Click it to launch the application.

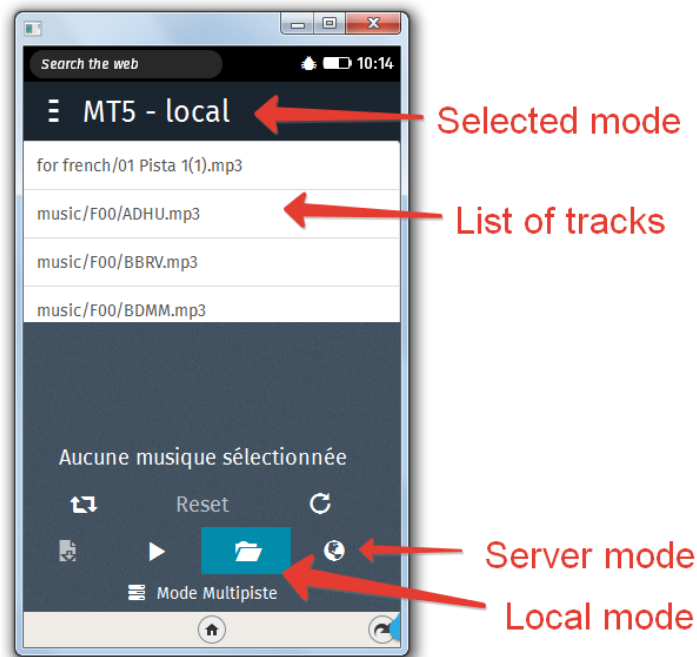

Main view

Main view can be divided into three parts. On the top you see the Selected Mode of work. Below is the list of available tracks. In the middle of the page is the main working area to work with the song (you can play and pause the songs, create the

loops, restart the song etc). In the bottom of the screen you can change the mode of work:

Press this icon to select the Local Mode. It allows you to choose the song from the list of songs of your device.

Press the icon to select the Remote Server Mode. If you have Internet access it allows you to work over with the songs available on the Remote server.

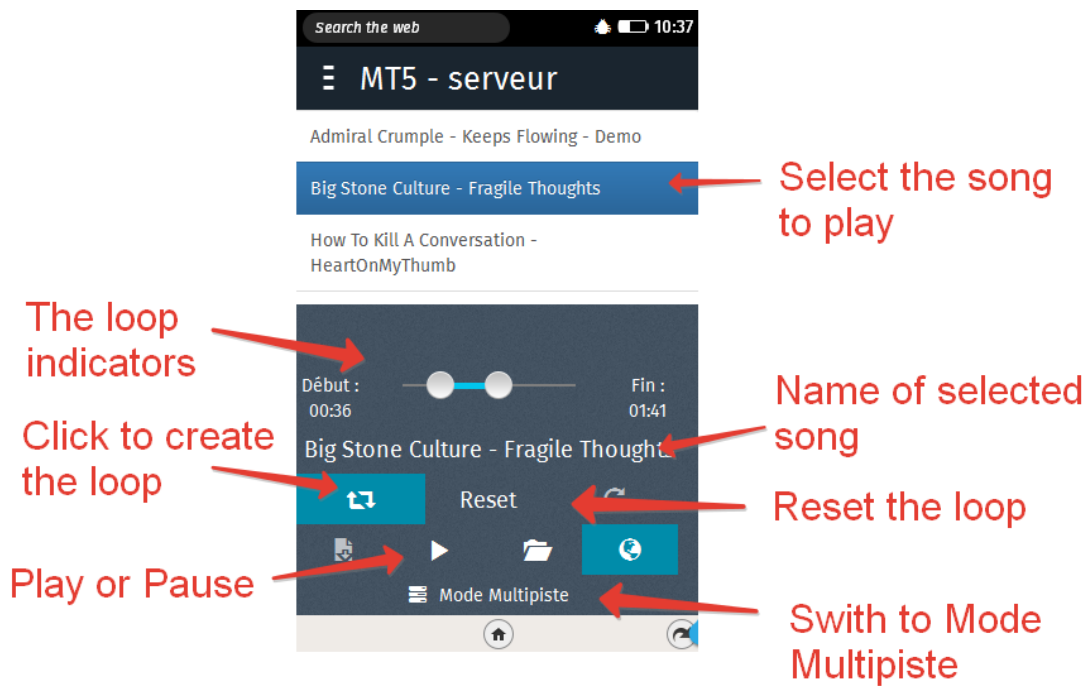

Work with songs

Select the song from the list of available songs by clicking it. After it will be uploaded in the application you will get possibility to work with it.

Press to play or pause the song

Press this icon to create the loop. The loop indicators will appear in the working area. You can set them up to your preferences.

Press Reset to reset the loop.

Press this icon to restart the song.

Select the song to play

The loop indicators

Click to create the loop
